

Workstation and VMplayer

How can I disable the top-bar when running VMplayer in Fullscreen-mode

on Windows-hosts add this line to preferences.ini in user-profile\application data\vmware
`pref.vmplayer.fullscreen.nobar = "TRUE"`

on Linux add to /home/user/.vmware/preferences
`pref.vmplayer.fullscreen.nobar = "TRUE"`

if the setting does not work - check vmware.log for syntax-errors while editing !

If you do not find the preferences.ini file on your system open a vmware.log and search for preferences.ini

You will find the full path then
