

add apps

VMware Converter 3.0.3

Download:

- [VMware-converter-3.0.3-89816.exe](#)

Description:

- this version has the -boot switch and so can be used for Coldclones
must be launched using the moa.exe right click option to start in coldclone mode
- if installed on the fly and launched by clicking converter.exe directly it can be used
hotclones

CD-only builds:

- use the MOA-setup option
- if that fails - install Converter 3.0.3 some where else - in a VM for example and copy the installation directory to
`moa241build\pebuilder\BartPE_sfx_\converter`
- then rebuild the iso

USB builds:

- if you have Converter 3.0.3 already installed somewhere simply copy the installation directory to `R:\vm\converter`
- if not - boot MOA-bandit and install Converter 3.0.3 to `R:\vm\converter`
